CREMLIN PLUS
Connecting Russian and European Measures for Large-scale Research Infrastructures

About News Work Programme Collaboration Materials

CREMLINplus (Connecting Russian and European Measures for Large-scale Research Infrastructures – plus) is a scientific and technical collaboration in the field of research infrastructures. Advancing specific infrastructure projects, exploring access mechanisms to Russian research infrastructures for international utilisation as well as of CREMLINplus.

CREMLIN PLUS

Connecting Russian and European Measures
for Large-scale Research Infrastructures

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 871072.

Website: <https://www.cremlinplus.eu/>

The screenshot shows the homepage of the CREMLIN PLUS website. At the top, the logo "CREMLIN PLUS" is displayed in blue, with the "P" and "L" in red and a yellow plus sign. Below the logo is the tagline "Connecting Russian and European Measures for Large-scale Research Infrastructures". To the right of the tagline are icons for social media (Facebook, Email, Twitter). A navigation bar contains five menu items: "About", "News", "Work Programme", "Collaboration", and "Materials". The main content area features a grey box with a paragraph of text about the project and a "More Information" link. Below this is a section titled "CREMLINplus news" with a sub-heading "CREMLINplus Annual Meeting 2021" and a "Read more" link. A photograph of a group of people is shown to the left of the news section.

CREMLIN PLUS

Connecting Russian and European Measures for Large-scale Research Infrastructures

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 871072

ABOUT

CREMLINplus is a flagship project dedicated to enhancing the **European-Russian collaboration** in the domain of research infrastructures and megascience projects.

AIMS

- Fostering European-Russian scientific and technical **collaboration** along five Russian megascience projects
- Developing **access schemes** to Russian research infrastructures that facilitate also European utilisation, alongside Russian utilisation
- Creating a comprehensive **base of knowledge** and expertise for Russian and European research infrastructure managers and scientists at various levels

PROJECT FACTS

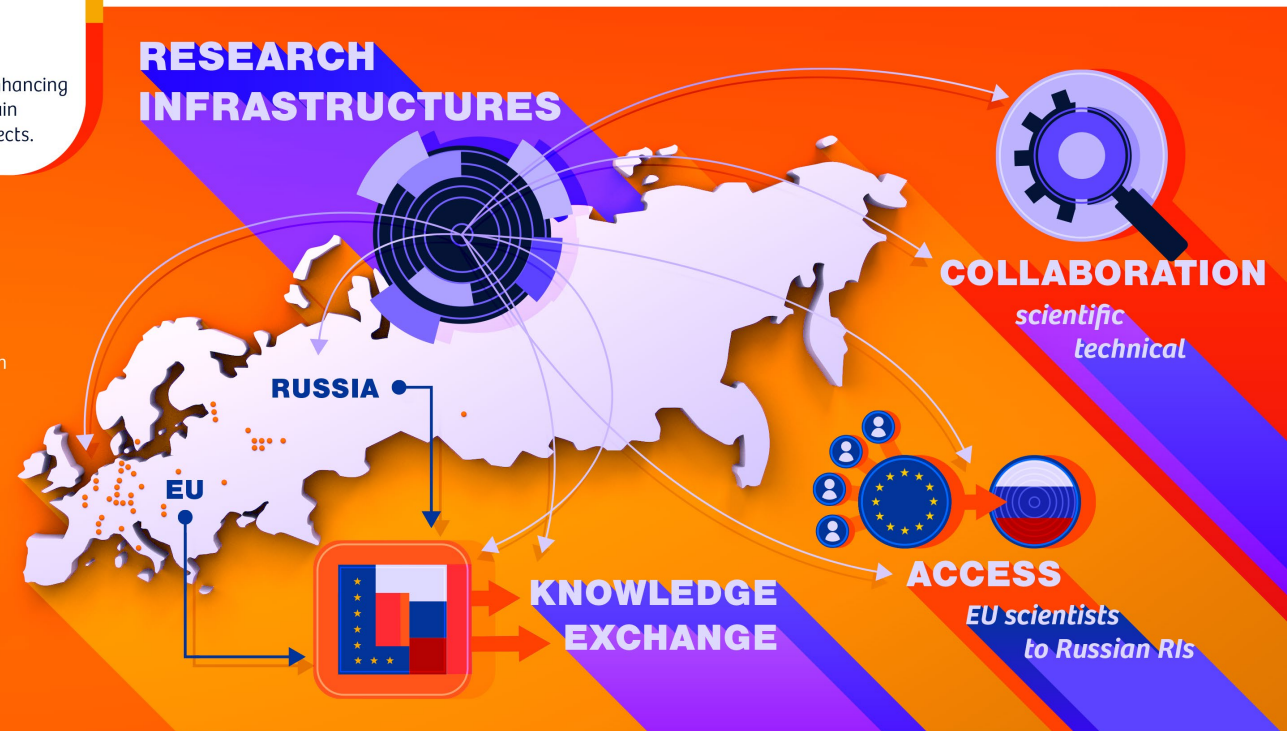

- **Consortium: 35 partners** from the EU MS/AC and Russian Federation

Project duration: 4 years
02/2020 – 01/2024

WORK PROGRAMME

Technical WPs
Non-technical WPs

WP1 MGT: *Management and Dissemination*
 WP2 NICA: *Collaboration with ion collider NICA*
 WP3 PIK: *Collaboration with neutron source PIK*
 WP4 USSR: *Collaboration with synchrotron USSR*
 WP5 SCT: *Joint technology development around SCT and future lepton colliders*

WP6 XCELS: *Joint technology development around high-power laser XCELS*
 WP7 DETEC: *Joint development of detector technologies*
 WP8 TNA: *Access to Russian RI*
 WP9 TRAIN: *Staff exchange and training for RI management*
 WP10 LTS: *Joint long-term sustainability of RIs*

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 871072.
