## The quest for nano-beam sizes

*Friday 18 June 2021 10:00 (30 minutes)*

<https://desy.zoom.us/j/95942295747>

In the last years different technologies have been developed for creating, handling, and preserving nanobeams size beams. In the talk I will review the different designs, experimental results, hardware and technologies, current limitations and new applications of the technology that will enable smaller and smaller beams.

**Presenter:** FAUS-GOLFE, Angeles

**Session Classification:** Plenary Session 3
