

Loops and Legs 2006

Monday 24 April 2006

Monday afternoon (14:30 - 18:00)

time	[id] title	presenter
14:30	[45] Recent Developments in FORM	VERMASEREN, J.
15:00	[46] Third-order QCD results on form factors, splitting functions and coefficient functions	VOGT, A.
15:30	[32] Analytical evaluation of differential distributions in Mellin space	MITOV, A.
16:00	Coffee	
16:30	[31] Electroweak Corrections for Top Quark and Gauge Boson Production at Hadron Colliders	KÜHN, J.
17:00	[2] Precise predictions for the electron energy spectrum in muon decay	ANASTASIOU, Ch.
17:30	[5] One-loop techniques and first applications for LHC phenomenology	BINOTH, T.
