

## Job opportunity: Support scientist at NASA's HEASARC data archive

*Friday 16 July 2021 12:00 (1 minute)*

We are looking for a support scientist to join the HEASARC team to provide the data and tools needed to extract the most high energy astrophysics science from NASA data. See the full job ad at <https://jobregister.aas.org/ad/499c4693>.

This position:

- is mostly about technical support (Python, Docker, Virtual Observatory, etc.);
- includes time for independent research;
- is open to non-US citizens/residents (help with visa is provided);
- is not tenured but is a multi-year position of indeterminate duration.

Please feel free to contact me during or after the meeting if you have questions. A lot of skills are listed, but we don't expect one person to be an expert in all of this from the start. Apply anyway, and learn on the job!
