

Astroparticle Experiments and Astronaut Safety

Wednesday 14 July 2021 12:06 (1 minute)

The AMS02 INFN Rome group is looking for a person for a postdoctoral position in the field of researching the effects of space radiation on human health.

The objective of the position, lasting one year, will be the production and analysis of particle flows with the AMS-02 experiment to support studies in space radiobiology and dosimetry.

Type of post
