

Looking for postdoc in astroparticle physics (theory/pheno)

Wednesday 14 July 2021 10:17 (1 minute)

Hi, my name is Matthias Vereecken and I am looking for a postdoc position in astroparticle physics. I obtained my PhD at the end of 2019 at the Vrije Universiteit Brussels. My main interests are the origin of high-energy neutrinos and their connection with other messengers (gamma rays, cosmic rays and gravitational waves), as well as using these messengers as probes of new physics.
My publications and thesis can be found on the arxiv.

For further information, contact me on at vereeckenmatt@gmail.com.

Type of post

PostDoc
