

REF2021 LOCM: plenary talks

Armando Bermudez Martinez
23.06.2021

Local Organizing Committee

- Markus Diehl
- Sara Taheri Monfared
- Qun Wang
- Ami Rostomyan
- Hannes Jung
- Armando Bermudez Martinez

Format and dates

Online

15-19 November

Previous meeting

<https://indico.desy.de/event/28332/>

Status

- updated indico page: <https://indico.desy.de/e/REF2021>
- inspire entry: <https://inspirehep.net/conferences/1839127>

Format of the sessions

- Do we want parallel sessions (REF2020 style) → more speakers
- or single sessions → fewer speakers

Proposal for Monday 15th November

- Overview of recent developments in TMD calculations (Ignazio, ...)
- Overview on PS and resummation (Torbjorn, Leif, Stefan, Simon, ...)
- Perspectives of EIC for probing TMD contributions (Markus)
- Discussing specific observables sensitive to TMD effects:
 - * low mass, low k_t Drell-Yan spectra (Hannes)
 - * qt resummation at HERA ()
 - * CS kernel from MC (Vladimirov)

TODO

- We should have a timeline including plenary talks by early August
- Ideally with confirmed plenary speakers
- contact the REF groups for abstracts
