

Key4hep installation on nfs

`/nfs/dust/ilc/group/cvmfs_ilc/sw/key4hep/setup.sh`

or (if you only want the iLCSoft parts)

`/nfs/dust/ilc/group/cvmfs_ilc/sw/key4hep/init_ilcsoft.sh`

- Contains a complete iLCSoft installation (not corresponding to an existing iLCSoft release)
- The [“standard workflow”](#) needs a few minor fixes for the miniDST part ([ILDConfig#127](#))
- Plan to use this with summer students
- [full installation guide on stash](#)
- Next steps:
 - afs installation?
 - cvmfs installation?
