workstatus

- Started Analysis of MadGraph sample (stored at dCache, used root)

workstatus

- Started Analysis of MadGraph sample (stored at dCache, used root)
- Generation of 100k $t\bar{t} + X$ jets ($X = 0, 1, 2, 3$) in SHERPA still undone, due to long calculation time

workstatus

- Started Analysis of MadGraph sample (stored at dCache, used root)
- Generation of 100k $t\bar{t} + X$ jets ($X = 0, 1, 2, 3$) in SHERPA still undone, due to long calculation time
- Divided job according to decay channels and set $X \leq 2$

workstatus

- Started Analysis of MadGraph sample (stored at dCache, used root)
- Generation of 100k $t\bar{t} + X$ jets ($X = 0, 1, 2, 3$) in SHERPA still undone, due to long calculation time
- Divided job according to decay channels and set $X \leq 2$
- $\rightarrow$ Still taking to long

workstatus

- Started Analysis of MadGraph sample (stored at dCache, used root)
- Generation of 100k $t\bar{t} + X$ jets ($X = 0, 1, 2, 3$) in SHERPA still undone, due to long calculation time
- Divided job according to decay channels and set $X \leq 2$
$\rightarrow$ Still taking to long
- Started FastSimulation (Zeuthen batch / NAF batch) with test files from SHERPA, trying to recompile old version, to be comparable to MadGraph Analysis
