

OPENING SYMPOSIUM 2022

Contribution ID: 116

Type: **Poster**

Helmholtz Imaging - Capture the world of science

Helmholtz Imaging's mission is to unlock the potential of imaging in the Helmholtz Association. Image data provide a substantial part of data being generated in scientific research. Helmholtz Imaging is the overarching platform to better leverage and make accessible to everyone the innovative modalities, methodological richness, outstanding expertise and data treasures of the Helmholtz Association.

Helmholtz Imaging empowers and supports scientists in all aspects of imaging, on different occasions, at any point in their career and at all levels. Imaging-based research projects are encouraged to contact us for scientific or technical support, to enter into collaborations with our research groups, or to network with imaging experts from other Helmholtz programs.

With this poster we introduce our portfolio to you, and show all the possible ways how you can interact with or benefit from us and our services. DESY is hosting the Helmholtz Imaging coordination team as well as one of three support units.

Discover our portfolio and become a part of Helmholtz Imaging!

Primary authors: SCHWARTZ, David (IT (Research and Innovation in Scientific Co)); RHEE, Franz (IT (Research and Innovation in Scientific Co)); SANDER, Knut (Helmholtz Imaging Platform HIP); HEUSER, Philipp (DESY/Helmholtz Imaging); KRAUSE-SOLBERG, Sara (FS-PETRA (PETRA III))

Presenter: HEUSER, Philipp (DESY/Helmholtz Imaging)

Session Classification: Poster session with buffet

Track Classification: CDL2 (Photon Science)
