Type of event | Number of participants

Type of event: *Workshop*

Number of participants: 50 – 60 on campus

Brief description of the type and scope: Annual Meeting of the Helmholtz Alliance “Physics at the Terascale”

Hygiene rules

In general, the admission rules according to the DESY Corona Guidelines (https://www.desy.de/coronavirus/index_eng.html) apply; for DESY employees, the DESY Guidelines Coronavirus/COVID-19 continue to apply.

All participants must comply with the rules according to 3G (Vaccinated, Tested or Recovered). This must be proven by appropriate certificates before the start of the event. Rapid antigen tests will be used for testing. The regulations of the Free and Hanseatic City of Hamburg regarding the maximum validity of rapid antigen tests apply.

Persons are considered to be fully vaccinated from 14 days after the last necessary vaccination.

All participants, contributors and external service providers (especially convalescents and vaccinated persons) will be additionally asked to carry out a self-test before the event when they receive their invitation.

Masks are compulsory for all persons in the event area during the entire event. Participants on the podium/participants in the hall may remove their masks after reaching their fixed location/seat.

Implementation

Participants will be assigned a fixed place. Here, the arrangement of chairs is such that the minimum distance stipulated in the applicable regulation is observed.

Contact tracking will be done via the Corona WarnApp. If participants do not wish to be tracked digitally, individual slips and pens will be provided. Data will be kept for 4 weeks.

The use of microphones will be organised in line with the pandemic.

For catering, only packaged food will be distributed for self-service. Unpacked food will be served according to the regulations of the canteen.

In all other respects, the rules for events provided for in the DESY Corona Guidelines shall apply.

Tracking

In the unlikely event of a recognisable suspicion of infection in a person with COVID-19, the following measures are taken:

- Immediate information of the company medical service and D5
- Immediate information of all persons participating in the workshop by the organisational team at DESY via e-mail.
- Determination of all possible further contact persons during the stay at DESY and classification of the degree of contact by the company medical service.
