PHYSICS AT THE TERASCALE

Deutsches Elektronen-Synchrotron DESY + + + Karlsruher Institut für Technologie - Großforschungsbereich + + Max-Planck-Institut für Physik + + + Rheinisch-Westfälische Technische Hochschule Aachen + + + Humboldt-Universität zu Berlin + + + Rheinische Friedrich-Wilhelms-Universität Bonn + + + Technische Universität Dortmund + + + Technische Universität Dresden + + + Albert-Ludwigs-Universität Freiburg + + + Justus-Liebig-Universität Gießen + + + Georg-August-Universität Göttingen + + + Universität Hamburg + + + Ruprecht-Karls-Universität Heidelberg + + + Karlsruher Institut für Technologie - Universitätsbereich + + + Johannes Gutenberg-Universität Mainz + + + Ludwig-Maximilians-Universität München + + + Universität Regensburg + + + Universität Rostock + + + Universität Siegen + + + Julius-Maximilians-Universität Würzburg + + + Bergische Universität Wuppertal + + +

Virtual Monte-Carlo School 2021

8-12 November 2021 (on Zoom)

PB TMDs with CASCADE

Programme:

- Intro to MC techniques and Parton Shower (S. Prestel, Lund)
 - Intro to Parton Branching TMDs (F. Hautmann, Oxford/Antwerp)
 - Intro to CASCADE (A. Bermudez Martinez, DESY)
 - Physics at future colliders (M. Mangano, CERN)
-
- Exercises on high pT di-jets at LHC energies
 - Results of exercises will be presented at REF2021 workshop and published

Organisation Team: Armando Bermúdez Martínez (DESY), Hannes Jung (DESY), Sara Taheri Monfared (DESY), Qun Wang (DESY)

Please register on <https://indico.desy.de/event/31877/>

www.terascale.de/mc2021

PB TMDS with CASCADE: technical Setup

- We will run all on DESY bird cluster
- You need school account & passwd
 - get it from [here](#)
 - mark an account in the list and copy the passwd
 - no need to change passwd, they stay active over the school time
- Login to DESY machine:
 - ssh -XY [schoolXX@bastion.desy.de](#)
 - ssh -XY pal

PB TMDS with CASCADE: technical Setup

- We run everything under www directory, this allows to view files and plots on local browser.

- Login to your account
 - then do (only once)

```
mkdir www
```

```
fs setacl -dir www -acl desy-hosts read
```

```
cd www
```

- Copy startup kit to your directory:
 - cp -rp /afs/desy.de/user/j/jung/public/mcschool2021/cascade3 .
 - cd cascade3
- Prepared Yoda files (Histogram files) are linked with YodaFile dir
 - ls -l YodaFiles/*

PB TMDS with CASCADE: technical Setup

- We are using the Rivet package for analyzing MC output, comparing with measurements and plotting
- Produce your first plots with rivet:

```
cd cascade3
source setup.sh
rivet-mkhtml --mc-errs -o PB-fNLO YodaFiles/cascade3.1.1-13TeV-
aMCatNLO-jj-lhescale2-Onshell=1-QED=0-Had=1-TimeShower=1-TimeS=4-
scaleFS=1-SpaceShower=1-
Iglu=102200unc_merged.yoda:"MCatNLO+CAS3:BandComponentEnv=MUR.*MUF.*:E
rrorBandOpacity=0.3" YodaFiles/cascade3.1.1-13TeV-aMCatNLO-jj-fNLO_
merged.yoda:"fNLO:BandComponentEnv=MUR.*MUF.*:ErrorBandOpacity=0.3"
```

- or just look on README.plot and copy the line from there

PB TMDS with CASCADE: technical Setup

- The rivet commands for plotting can be found here.
- Look at the plots under PB-yy with a browser and try to understand what is plotted.
 - open a browser window and go to: <https://www.desy.de/~schoolXX/> where schoolXX is your school account,
 - look for cascade3/PB-yy
- CASCADE webpage
 - manual
 - and installation instructions
- also have a look at TMDplotter: <http://tmdplotter.desy.de>
- and the TMDlib webpage and the manual
