## Rapidity-only TMD factorization at the NLO

*Friday 4 November 2022 14:50 (15 minutes)*

A production of a particle with a small transverse momentum in hadron-hadron collisions is described by CSS-based TMD factorization at moderate Bjorken  $x_B \sim 1$  and by  $k_T$ -factorization at small  $x_B$ . A uniform description valid for all  $x_B$  is provided by rapidity-only TMD factorization developed in a series of recent papers. In this talk I present the results for the rapidity-only TMD factorization at the NLO level.
