Helmholtz Imaging

Helmholtz Imaging's mission is to unlock the potential of imaging in the Helmholtz Association. Image data provide a substantial part of data being generated in scientific research. Helmholtz Imaging is the overarching platform to better leverage and make accessible to everyone the innovative modalities, methodological richness, outstanding expertise and data treasures of the Helmholtz Association.

Helmholtz Imaging empowers and supports scientists in all aspects of imaging, on different occasions, at any point in their career and at all levels. Imaging-based research projects are encouraged to contact us for scientific or technical support, to enter into collaborations with our research groups, or to network with imaging experts from other Helmholtz programs.

Discover our portfolio and become a part of Helmholtz Imaging!

Primary authors: Mrs SCHMIDT, Deborah (Helmholtz Imaging / MDC); ISENSEE, Fabian (HIP Applied Computer Vision Lab, German Cancer Research Center (DKFZ)); SANDER, Knut (Helmholtz Imaging Platform HIP); HEUSER, Philipp (DESY/Helmholtz Imaging); KRAUSE-SOLBERG, Sara (FS-PETRA (PETRA III))

Presenter: HEUSER, Philipp (DESY/Helmholtz Imaging)

Session Classification: Conference Dinner with Poster exhibit

Track Classification: Data Management and Analysis
