

## Overview of CERN LLRF activities 2010-2011

*Monday 17 October 2011 14:30 (20 minutes)*

CERN LLRF activities of the past two years are reviewed. This includes the first two years of LHC Physics running and in particular how the LLRF systems in the injector chain have contributed to the steep luminosity increase in LHC. Major upgrade projects for the future are also reviewed, along with new activities that started in the area of control of super-conducting RF cavities.
