**Tuesday 31 May 2022 - Tuesday 31 May 2022**

**online**

## **Scientific Programme**

## Basics of intellectual property (IP) rights for software developers and scientists.

This workshop will deal with the following possible topics and questions like:

what can be protected by copyright law?

rights of the author / copyright holder; rights of the employer

difference between copyright, usage right and exploitation right

what to consider when

using software / code from others (open source, closed source, commercial license, no license),

distributing software / code (own code or from others),

integrating code from others in my own code,

exploiting my own code

what can happen if I violate the rights of others

commercial usage or exploitation of software / code (open source is not necessarily an exclusion criterion)
