Higgs boson inclusive cross section and coupling measurements (incl STXS) at CMS - bosonic channels

Monday 21 August 2023 17:30 (20 minutes)

In this talk, the latest results from the CMS experiment on inclusive and simplified template cross section measurements of the Higgs boson are discussed. We cover the latest measurements for the bosonic decay channels in this presentation. Measurements of the Higgs boson couplings in the bosonic Higgs boson decay channels are also presented.

Collaboration / Activity

CMS
