Status of the ILC and the ITN

Thursday 24 August 2023 10:00 (15 minutes)

In 2023, ILC entered into a new stage. A new budget to facilitate the developments of accelerator technology especially focusing on three topics, SRF, nano beam and particle sources, which are important for the ILC, was approved. To maximize the output of these activities, the International technology network has formed. In this presentation, the latest status of the project on accelerator development will be reviewed.

Collaboration / Activity

ILC
