

# Scope of several meetings

- LHC Discussion
- Terascale Analysis Center events

# LHC Discussion

- Scope:
  - Bring together colleagues from ATLAS, CMS, Theory on one topic (e.g. Higgs, SUSY, SM, top, but also Tracker upgrade): 20 min per presentation
  - In addition: conference reports after major conferences (also of interest for other groups like Belle and FTX, therefore requested that the mailing list always addresses all)
- Depending on the topic, (partly) different audience, on average 40-50 people
- Time: Monday 11-12:30, usually SR 1
- Suggestions:
  - Extend scope to FH Discussion, including e+e- community
  - Aim for 2-3 talks per session
  - Aim for common lunch after the meeting
  - Hybrid

# Terascale Alliance Events

- Theorist of the month seminar:
  - Scope: ~1h seminar on more general theory topic
- Analysis center seminar:
  - Scope: ~40 min seminar on more specific topic, given by younger speaker who is the expert on this topic
