Introduction

Federico Meloni (DESY), Matthew Wing (UCL)

LUXE DAQ WG kick-off
22/06/2022

Miscellanea

In case you haven't subscribed yet, please sign-up to our dedicated mailing list: luxe-daq-computing@desy.de

The meetings will live under: https://indico.desy.de/category/913/
For now, we propose a bi-weekly schedule, alternating DAQ and computing-focused meetings.

- Next DAQ-focused meeting 20/07
- We'll re-evaluate the meeting frequency as needed

Do we need anything else?

- We could set up mattermost channels, if people find that useful

Today and the next meetings

Today: use this meeting to get in touch with each other and learn about needs/news from each detector.

We'll use the collected material to organise the upcoming meetings.

Some items already on the list:

- EUDAQ tutorial / hackaton
- Discussion on RAW data format (and compatibility with key4hep)
- Review of changes and developments since the TDRs
- Plans for (emulated? combined?) tests
- …

Please feel free to bring up any other topic you'd like to see discussed.
