Introduction

Federico Meloni (DESY), Matthew Wing (UCL)

LUXE DAQ meeting
03/08/2022

Miscellanea

In case you haven't subscribed yet, please sign-up to our dedicated mailing list:
luxe-daq-computing@desy.de

The meetings will live under: https://indico.desy.de/category/913/
For now, ~ bi-weekly schedule, alternating DAQ and computing-focused meetings.

- Skip one meeting because of holiday season
- Computing-flavoured kick-off on August 31st
- **Next DAQ-focused meeting 14/09**

We'll re-evaluate the meeting frequency as needed

Do we need anything else?

Today and the next meetings

Today: complete the detector round-table to get in touch with each other and learn about needs/news from each detector.

We'll use the collected material to organise the upcoming meetings.

Items for follow-up from 1st meeting:

- EUDAQ tutorial / hackaton will be organised in fall
- Discuss Laser data archival strategy (synchronisation, database, lifetime and re-analysis)
- Use of FELIX for tracker and interplay with TLU/EUDAQ
- Updates on slow-control for all systems (?)
- Synergy between Cherenkov and Gamma profiler (CAEN FERS)

Please feel free to bring up any other topic you'd like to see discussed.
