

# **Fast and Continuous ADC sampling using TEWS TAMC532 and STRUCK SIS8303KU in synchronous and asynchronous ways.**

*Thursday 8 December 2022 11:45 (15 minutes)*

Continuous data acquisition in recent times has become more popular.

Implementation of the continuous ADC sampling with data storing has some restrictions, such as short data acquisition time and limited CPU memory.

Our experiences and test of the fast and continuous ADC sampling using TEWS TAMC532 and STRUCK SIS8303KU in synchronous and asynchronous ways is presented.

**Presenter:** PETROSYAN, Ludwig (DESY)

**Session Classification:** Session 8

**Track Classification:** Software and firmware
