

CMS Tracker Module Testing

We offer a project related to the CMS Outer Tracker Upgrade. At DESY, we will produce 1200 PS modules, whose components have to be tested prior to assembly. Moreover, assembly procedure are currently being verified as well as the testing procedures for final modules.

The student will involved in these activities working in the Detector Assembly Facility.

Field

B3: Development of experimental particle physics equipment (hardware-oriented)

DESY Place

Hamburg
