Community White Paper

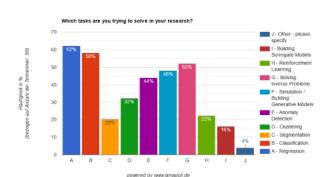

Federated Infrastructures in Research on Universe and Matter: State of Play

DIG-UM Topic Group Federated Infrastructures
October 17, 2022

Abstra

As a first output of the DIG-UM Topic Group on Federated Infrastructures, this document tries to provide a concise and necessarily subjective overview of the state of play of digital research infrastructures in the domains covered by DIG-UM's eight communities with a particular focus on Germany. Its main goal is to help the community members to understand the practices and technologies already established in the participating domains. It may also be useful to identify progress made as DIG-UM advances.

Survey of Needs

ErUM-Data – NFDI - DMA White Paper

Summary of a Synergies Workshop between ErUM-Data, the NFDI Consortia DAPHNE4NFDI and PUNCH4NFDI, and Helmholtz DMA

Abstrac

This short document describes the outcome of a workshop between representatives of ErUM-Data, the NFDI consortia DAPHNE4NFDI and PUNCH4NFDI, and Helmholtz DMA on synergies between the these initiatives and related endeavours. Arising conclusions are drawn, and next steps are sketched.

Preparing Workshop

Next Generation Environment for Interoperable Data Analysis

ESCAPE

Workshops & Schools

- All tasks in digital transformation are highly interconnected.
- ErUM-Data funding calls address partial aspects.
- Joint responsibility all topic groups: ensure all aspects adequately pushed forward
 - → enabling ErUM researchers to conduct even better research.

Workshop Sustainability in ErUM-Data

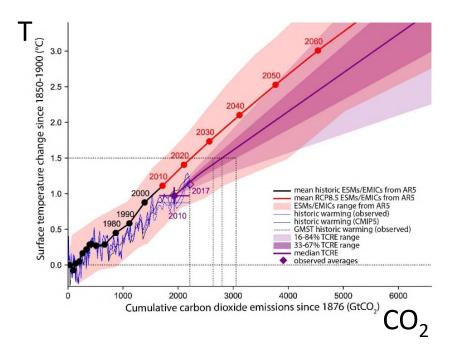

30.5.-2.6.23 in Meinerzhagen (NRW)

Sustainability will play a significant role in BMBF funding, needs to be considered when submitting applications.

Outline written perspectives on topics:

- Federated Infrastructures,
- Big Data Analytics,
- Research Data Management.

Messages to ErUM-Data-Hub in relation with DIG-UM

- Area of education & training "Strengthening Digital Competencies" received strong support.
- Interfaces between Helmholtz centers/platforms and universities to be further developed.
- NFDI & ErUM-Data must clarify overlap and synergy in order to avoid divergent developments.
- Expectation management: prospects of "realistic feasibility" to the BMBF.
- Access to new hardware structures, DIG-UM needs to follow these developments.
