

# 12th International Conference on Elastic and Diffractive Scattering - Forward Physics and QCD

## Tuesday 22 May 2007

### Diffraction in pp and ppbar collisions - Lab 2, Sem 2 (16:30 - 18:30)

time	[id] title	presenter
16:30	[32] QCD analysis of diffractive processes, implications for LHC	L SCHOEFFEL
16:50	[33] Exclusive DPE production at the Tevatron and the LHC	O KEPKA
17:10	[34] Diffractive production of quarkonia and Higgs boson	A SZCZUREK
17:30	[36] Rapidity gaps in pp $\rightarrow$ pp H and gamma p $\rightarrow$ VM+gap at large t	M STRIKMAN
17:50	[83] Pomeron intercept and slope: the QCD connection	GOULIANOS, K
18:10	[35] Exclusive J/psi and Upsilon hadroproduction as a probe of the QCD odderon	L SZYMANOWSKI
