

12th International Conference on Elastic and Diffractive Scattering - Forward Physics and QCD

Thursday 24 May 2007

Heavy-ion collisions - Main Auditorium (09:00 - 11:00)

time	[id] title	presenter
09:00	[58] Measurement of the cross section and the single transverse spin asymmetry in very forward neutron production from polarized pp collisions at RHIC	M TOGAWA
09:25	[59] Gluon saturation: from pp to AA	A KOVNER
09:50	[60] Ultraperipheral collisions at RHIC	J NYSTRAND
10:15	[61] Fractional energy losses in the black disk regime and BRAHMS effect	M STRIKMAN
10:40	[62] The coherent inelastic processes on nuclei at ultrarelativistic energies	V V LYUBOSHITZ
