

12th International Conference on Elastic and Diffractive Scattering - Forward Physics and QCD

Thursday 24 May 2007

Lepton-proton collisions - Main Auditorium (14:00 - 17:30)

time	[id] title	presenter
14:00	[66] Low Q ² Structure Functions	J KRETZSCHMAR
14:20	[67] Status of Deeply Inelastic Parton Distributions	J BLUEMLEIN
14:45	[68] Diffractive PDFs	P LAYCOCK
15:05	[71] Factorisation breaking in diffraction, including leading baryons	A BONATO
15:30	Coffee and conference photograph	
16:00	[70] Diffractive structure function FLD from fits with higher twist	K GOLEC-BIERNAT
16:25	[69] Diffractive parton distributions: the role of the perturbative Pomeron	M RYSKIN
16:50	[72] Multiple interactions at H1 and ZEUS	T NAMSOO
17:10	[73] Diffractive neutral pion production, chiral symmetry and the odderon	O NACHTMANN
