

TAG Meeting

WP3: Hermann Heßling, Stefan Wagner

PUNCH4NFDI

Dec. 15, 2022

Agenda

1. Status WP3
2. Next steps
3. AOB

Participants

Baida Achkar

Makarim Bouyahioaoui

Alexander Göggelmann

Hermann Heßling

Alexander Huhn

Ramin Marx

Tim Oelkers

Christiane Schneide

Stefan Wagner

1. Status

- Alexander
 - Intends to commit to the realization of the deliverables WP3-1 and WP3-2
- Baida
 - Main interest: WP 5
 - Integration of open data
 - Training
- Christopher
 - Main interest: AAI
- Makarim
 - Intends to commit to the realization of the deliverables WP3-1 and WP3-2
- Tim
 - Preparing an overview on dynamic metadata frameworks
 - Consideration of areas where NoSQL database tools are used, e.g. genomics

2. Next steps

- Alexander and Makarim
 - Coordinating their effort to realize deliverables WP3-1 and WP3-2.
 - Presentation of first results at the next monthly meeting.
- Ramin and Tim
 - Exchange on the specifics of using simulation data in gamma astronomy
 - Challenge: Telescopes of astroparticle physics are highly dynamic (change of observation directions, weather influences, ...), in contrast to the static detectors of high-energy particle physics. This has a strong impact on the volumes of simulation data and their metadata.
- Baida
 - Follow the results of this group, they are of interest in WP5
- Christopher
 - Reports on progress in AAI: relevant to WP3 in the medium term.

3. AOB

- Next meeting
 - Mid January
 - Invitation in due time

Thank you !
