R&D for highly segmented multidimensional detectors for future experiments
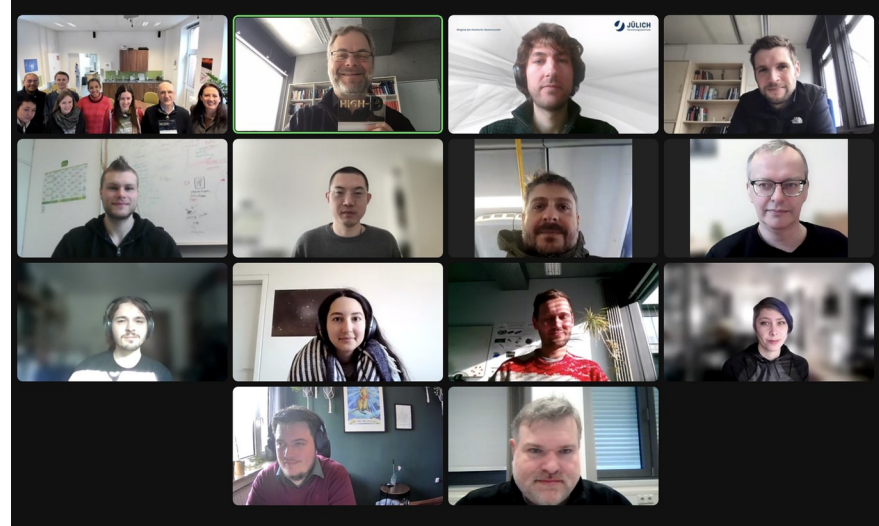

Erika Garutti & Heiko Lacker

The High-D collaboration

RWTH Aachen, HU Berlin, TU Darmstadt, U Freiburg, U Giessen, U Göttingen, U Frankfurt a. M., U Hamburg, DESY, U Heidelberg, JGU Mainz, MPI für Physik München, TU München, U Bonn, FZ Jülich, GSI

3rd consortium meeting: Closing Remarks

Thanks a lot for the contributions HIGH-D
and the lively discussions!

Exchange is fruitful!

PI meeting: Next steps ahead of us HIGH-D

➔ BMBF reporting 2022: we are asked to compile a consortium-wide report with

2021-22 achievements by 1st of April 2023 !!!

We ask

→ all the groups to list the highlights/milestones/achievements

(and add photos, graphs etc. for communication to the outside world)

→ the PIs to provide one paragraph of executive summary of the achievements

on the confluence page to ease the work for Erika and Heiko

➔Aim for in-person (with hybrid option) meeting in fall 2023 (e.g. at DESY)
