

Shifts at P5 this year

Conditions

- Minimum duration: 1 month, at best from 1st to last day of the month, longer stays can be discussed (payment through Reisekostenpauschale (linked to the indico), needs to be asked for ~1 month before the travel, in addition you need to fill a travel request)
- At best 2 people per month can go to CERN for shifts (to ensure that the car is available for the shifters)
- Minimum amount of shifts: **12**, more welcome
- Weekend and/or night shifts are encouraged (when taking weekend shifts, you can take two days off during the week to account for the time)
- During the time at CERN, you are strongly encouraged to join your working group meetings, the WGM, and CERN seminars in person in order to connect to the local people, esp. your group conveners

Accommodation and transport

- Only one person booking a studio or so, or 2 students/postdocs sharing a 2-room apartment for one month that is directly booked and paid by the students/postdocs who live there - this way a new apartment can be booked each month, which also includes that cleaning is done at the end of each month (since a new apartment will be booked per group and it is not necessarily the same one).
- Need to check for apartments, prices went up since our last investigation...
- CERN apartments (e.g. studio for 1 person for 1230 CHF:
<https://sce-dep.web.cern.ch/housing/cern-appartments>
- DESY car should be given with highest priority to people who have to go to P5
- “glide” app can also be used to rent a car sharing car to get to P5, but not for going to the supermarket or any other non-CERN place (registration takes a few days)

Organization

- Spreadsheet to collect your preferred months:
