Button type BPMs for Elettra 2.0

Tuesday 20 June 2023 14:30 (30 minutes)

In order to fulfill the target performance of Elettra 2.0 light source, a brand new button type beam position monitor detector has been developed.

In this contribution, a series of practical design considerations involving electromagnetic, mechanical, vacuum, maintenance, and cost issues are reported to illustrate the advantages and disadvantages of the conceived constructive solutions.

Summary
