

Contribution ID: 94

Type: **Poster without speed talk**

High-temperature superconducting (HTS) magnets for compact and brilliant light sources

This contribution describes the KIT's R&D towards small-scale, strong, efficient beam transport and undulator magnets for compact light sources employing HTS technology.

Speed Talks

I am unable/unwilling to give a speedtalk.

Primary author: Dr FATEHI, Samira (Karlsruhe Institute of Technology (KIT))

Co-authors: Dr GRAU, Andreas (Karlsruhe Institute of Technology (KIT)); Prof. MÜLLER, Anke-Susanne (Karlsruhe Institute of Technology (KIT)); BERNHARD, Axel (Karlsruhe Institute of Technology (KIT)); Dr HORNUNG, Frank (Karlsruhe Institute of Technology (KIT)); EISELE, Matthias (Karlsruhe Institute of Technology (KIT)); Dr RICHTER, Sebastian (Karlsruhe Institute of Technology (KIT), now at PSI); Prof. ARNDT, Tabea (Karlsruhe Institute of Technology (KIT))

Presenter: Dr FATEHI, Samira (Karlsruhe Institute of Technology (KIT))

Session Classification: Poster session

Track Classification: Accelerator Research and Development
