

## Analysis of $(n + 1)$ and $n$ -parton lines in LASS

*Thursday 18 April 2024 18:00 (30 minutes)*

In this talk I will present the status of a calculation of  $RV$  and  $VV$  contributions to 3-jet production in electron-positron annihilation at NNLO within the framework of Local Analytic Sector Subtraction. We will demonstrate the cancellation of infrared singularities and put on display the results of a numerical phase-space integration over the finite remainders. This is a step forward towards automation of NNLO calculations.
