P05 - Imaging Beamline

Thursday 5 October 2023 09:00 (3 hours)

The PETRA III P05 beamline is dedicated to full-field x-ray tomography. The microtomography setup of P05 offers 3D scans of samples of up to ~12mm size with 1-2 μm spatial resolution. Within the practical you will gain a detailed insight into how data is taken and subsequently processed.
