

ILDG workshop feedback

Wei Sun (CLQCD), Institute of High Energy Physics, CAS

- Hands-on exercises
 - Attend first exercise (followed the tutorial smoothly), missed the second one
 - New to the ILDG, still learning
- Suggestions
 - The command line tool and arguments should be explained in more details, maybe a bit more detailed documents
- Potential future collaboration
 - Build regional grid in China (ILDG or ILDG 2 ?)
 - Generating gauge configurations continuously these years (mainly based on Chroma)
 - Support, guidance from ILDG and other regional grids, and contribute to ILDG
