

The Muon Collider Study.

Tuesday, 27 June, 2023

Auditorium & Webcast 16:00 h

Daniel Schulte (CERN)

The muon collider concept promises a unique path to future high-energy, high-luminosity lepton colliders. The presentation will give an overview of the concept and its challenges. It will highlight the ongoing efforts to develop the concept and the technologies and the collaboration that carries out this work.

Please note:

This is a HYBRID colloquium!
