

# dCache Seminar – Accelerator Division

## Group Management in the new Registry (R2)

- **Registry 2**
  - management of accounts, passwords, groups, ressources, namespaces
  - management of personal data → IAM
  - relationship between IAM persons and their R2 accounts
  - R2 **namespace**
    - typically an institute or a DESY group, e.g. EMBL or MPY
  - R2 **account types**
    - primary (always first account of a person)
    - personal (additional account of a person)
    - functional (shared account / password, e.g. to store dCache data, no expiration date possible)
    - service (for important services, e.g. machine controls)
  - R2 **ressource**
    - to grant access to e.g. Mail, Sync&Share, Linux, Windows, Maxwell (partitions), NAF...
    - no ressource dCache

# dCache Seminar – Accelerator Division

## Group Management in the new Registry (R2)

- Registry 2
  - R2 group
    - list of accounts
    - belongs to a namespace
    - propagation to platforms like dCache, Sync&Share, Unix, Windows...
    - groups may include other groups(!), e.g. all members of a R2 group + some additional accounts (configuration via DESY IT only)
  - R2 roles
    - typically namespace supervisors, namespace admins, group admins
    - most IT group administrators are namespace supervisors and namespace admins
    - IT group administrators are able to create and manage R2 groups incl. designation of group admins
