- **European HDF User Group (HUG) plugins and data compression**

- When: 2023-09-19/2023-09-21

- Where: DESY and online

- **Abstract deadline**: 2023-08-28

- Link: https://indico.desy.de/event/39343/

- Topics: HDF5 plugins, Compression methods, Archivability of & long-term access to data stored in HDF5, HDF5 library language bindings and modules, Provenance, Side-cars and annotations, Reference platforms, … etc …

WG3 web-pages

- Add list of projects in the "current work" tab.

  - Basic information for newest projects, more to come.

  - We're very likely missing projects: please help us add ones you know of.

  - Currently limited to facility involvement. Should we add contact person/people, or other metadata?

- Add a "posts" tab for anything noteworthy

  - Current topics include upcoming workshops, paper publications, but could include anything else.

  - We want to make it possible for people to submit items themselves,

    - This is doable now (as a git pull request), but we want to add a HOWTO, so this isn't too daunting.

  - In the short-term, let "us" know if you have something.

WG3 web-pages: continued

- Add "open data" tab with list of repositories.

  - Goal is to make it easier to find public datasets.

  - Page is split into two parts: curating/publishing/cataloguing open data in PaN-related fields, and (public) data repositories from LEAPS facilities.

  - More public datasets would be nice.

  - Information is somewhat limited: should we add more details; e.g., number of datasets, copyright/license, contact person, ...

- Feedback on these new items is welcome: both new material and suggestions on how the existing material may be improved.

Status of repositories

- I received a request from Andy:

  Could you ask people what is the status of their data repositories? I would like to report on this at the IUCr meeting and having an up-to-date status would be useful.

- Can we use the web-pages to report on catalogue status?

  - How do we ensure information is up-to-date?
