

SFT Group Meeting

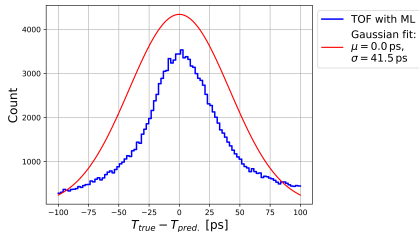

Status Update #9

Konrad Helms

24th August 2023

Recent Activity

- in highlight plots from last week: training and validation dataset mixed up
- created a new dataset - double checked everything
- in-depth model evaluation still pending
- still optimistic that the model performs well, since:

← IGNORE THE 'FIT'

- model after 4 epochs on new test dataset
- at the moment: cleaning up code, making code more readable to avoid such errors
