SEMINAR
Feldtheorie auf dem Gitter und
Phänomenologie der Elementarteilchen

Am Dienstag, dem **11 Juli**, um **15:30 Uhr s.t.** spricht

Dr. Robert Tweedie

University of Edinburgh

zum Thema

**Hadronic Physics from 2+1 flavour
Domain Wall QCD from QCDOC**

Abstract

A 14000 node QCDOC computer has been operational in Edinburgh for one and a half years. I present results from the ensembles generated on QCDOC using the domain wall fermion action and both the Iwasaki and DBW2 gauge actions. These lattices have volumes of $16^3 \times 32$ and $24^3 \times 64$ with a fifth dimension size of 8 or 16 and u and d masses as low as one quarter of the strange quark mass. I will present an overview of recent results from these lattices, in particular, I will discuss meson and baryon masses, quark masses and B_K .

Ort: DESY, Zeuthen
Platanenallee 6, 15738 Zeuthen, Hörsaal 2

Fahrverbindungen: S-Bahn-Station Zeuthen
