

Summary on the "2023 MicroTCA/ATCA for Large Scientific Facility Control Workshop" in China

Wednesday 6 December 2023 09:00 (15 minutes)

This is to report the 2023 MicroTCA/ATCA for Large Scientific Facility Control Workshop held in Shenzhen, China from October 31 to November 2. The workshop resumed the trend of annual MicroTCA meeting in China which was interrupted due to the Covid-19. There were over 84 participants registered and 35 talks presented in the workshop. Leaders of IASF and the Shenzhen FEL project's high-level executives participated in the workshop. The workshop introduced the latest achievements of MicroTCA at Desy, as well as many successful application cases in China. Participants also discussed about the future development of MicroTCA in China. Overall it was a very successful meeting to move forward the MicroTCA activities in China.
