

MTCA.4 Crate –From standard product to custom solution

Wednesday 6 December 2023 09:45 (15 minutes)

Each application is different and therefore needs some tweaks to the used hardware to adapt to the customers' requirements. This talk gives an overview about the nVent SCHROFF Standard MTCA.4 crates and how they are built on standard building blocks to easily adapt the crates to the application and customer requirements.

A few samples of custom specific crates will be presented and how they are designed based on the nVent SCHROFF standard Crates and standard building blocks.
