SEMINAR
Feldtheorie auf dem Gitter und
Phänomenologie der Elementarteilchen

Am Montag, dem **21. April**, um **15:30 Uhr s.t.** spricht

Dr. Tereza Mendes

Universidade de São Paulo and DESY

zum Thema

**Chiral phase transition in two-flavor QCD
at finite temperature**

Abstract

The order of the phase transition in finite-temperature QCD with two degenerate light quarks is still an open problem and corresponds to the last question mark in the zero-density phase diagram of QCD. We argue that establishing the nature of the transition in this case is also a crucial test for numerical simulations of lattice QCD, allowing precise estimates of possible systematic errors related e.g. to the choice of discretized formulation for fermions.
