

3rd International Workshop on Multiple Partonic Interactions at the LHC - MPI11

Monday 21 November 2011

Phenomenology of MPI (17:40 - 18:10)

time	[id] title	presenter
17:40	[12] Predictions for Wbbbar Production via Double Parton Scattering at the LHC	BERGER, Ed

Tuesday 22 November 2011

Phenomenology of MPI (09:00 - 10:30)

time	[id] title	presenter
09:00	[10] Double parton interactions in proton-deuteron collisions	TRELEANI, Daniele
09:30	[11] Correlations in Multi-Parton Interactions	KASEMETS, Tomas
10:00	[7] Double parton scattering with leptonic final states at the LHC	Dr KULESZA, Anna

Phenomenology of MPI (11:00 - 12:00)

time	[id] title	presenter
11:00	[9] Fluctuations of the nucleon transverse parton densities, and the structure of the inelastic collisions at the LHC.	STRIKMANN, Mark
11:30	[13] Double heavy meson production through double parton scattering	ZOTOV, Nicolai
