

SAS intro

Intro

- Major efforts in the last few weeks by Yee, Louis, Federico and Sasha for moving our simulation samples to the grid and tape:
 - Staging to tape will happen over the Christmas break
 - Let us know if there's something you need accessible from DUST
- Meetings during next year will follow the same format:
 - biweekly with planning in the same spreadsheet (first meeting probably on Jan 15, 2024)
 - Please plan your contributions as much as possible ahead and let us know of new/changed entries
- We will not start a new background campaign before the location, size and other details of the IP chamber are sorted
