

Moving FORWARD with Cosmic Rays

Gefördert durch

Deutsche
Forschungsgemeinschaft

How can we improve our understanding for **Cosmic Ray collisions with nuclei** in Earth's atmosphere? We can try to emulate these collisions in lab conditions
- with detectors in the **forward region at the LHC!**

An interdisciplinary project between the Astroparticle and High Energy Physics groups of **AG Berge** and **AG Issever** has just received funding in the form of the **DFG Sachbeihilfe** in the form of two PhD positions for three years!
