Status of the Diamond-II upgrade

Tuesday 27 August 2024 12:10 (20 minutes)

Funding for the Diamond-II Project was announced in September 2023. Diamond-II is a major upgrade of the Diamond facility, covering an upgrade of the storage ring to a low emittance lattice, three new 'flagship' beamlines and extensive upgrades to many existing beamlines, a programme of development of core software, controls and computing and the construction of a new building adjacent to the Diamond storage ring building. The main features of the project and the current status will be described.

I plan to submit also conference proceedings

No
