

# Loops and Legs in Quantum Field Theory

## Monday 16 April 2012

### Monday Afternoon (14:30 - 18:00)

| time  | [id] title   | presenter            |
|-------|--|----------------------|
| 14:30 | [45] Relations between gravity and gauge theory and implications for UV properties | BERN, Zvi            |
| 15:00 | [25] The infrared structure of gauge theory amplitudes and their high-energy limit | MAGNEA, Lorenzo      |
| 15:30 | [23] Testing NRQCD factorization in charmonium production at NLO                   | KNIEHL, Bernd        |
| 16:00 | Coffee break   |                      |
| 16:30 | [12] Higgs Lineshape   | PASSARINO, Giampiero |
| 17:00 | [21] Dimensional Reduction (and all that).   | JONES, Tim           |
| 17:30 | [67] Analytic results for multi-loop scattering amplitudes                         | HENN, Johannes       |
