

Question for the homework assignment

Please form small groups and discuss the question during the lunch break and report the outcome in the dedicated afternoon session.

1. Do you have any suggestion how to improve the working environment at DESY, especially for ECRs, both inside the group and in FH in general?

2. What is missing in terms of education and career mentoring for postdocs at DESY and in particular in the FH division?

3. The European Union has outlined 17 goals for sustainability (see next slide), what should DESY and particle physics at DESY in particular do to implement them?

4. What do you think about future colliders projects (in particular FCC, ILC,..) and about directions more in the future like plasma wakefield acceleration?

5. For what do you use ChatGPT? More generally on AI, how should DESY profit of AI?

6. Which local infrastructure and experiments at DESY do you find most interesting?

SUSTAINABLE DEVELOPMENT GOALS
