**BEATE NAROSKA
AWARD CEREMONY**

23 APRIL 2024

BEATE NAROSKA (1943-2008)

- 1989-2008: Professor in experimental particle physics at Universität Hamburg
- Excellent scientist, very devoted teacher and mentor
- Performed most of her research at DESY and CERN
- Made pivotal contributions to a wide range of questions in particle physics using data from the ISR, PETRA and HERA accelerators

QUOTE BEATE NAROSKA

"Although women scientists made significant contributions to research, their work was hushed up, devalued or attributed to men. Only very few were able to emerge from their shadowy existence and gain public recognition. [...] Women researchers almost always had a harder time than men due to gender stereotypes."

taz-Archive, 11. June 1994

THE BEATE NAROSKA GUEST PROFESSORSHIP PROGRAMME

- Awarded annually to two successful women scientists
- One Senior Award and one Junior Award
- Candidates must distinguish themselves by their excellent research as well as by being a visible role model for women in the discipline
- Proposals and Self-Applications possible

THE BEATE NAROSKA GUEST PROFESSORSHIP PROGRAMME

- Award includes: A certificate and personal prize money
- Invitation to Hamburg (up to six months)
- Support for travel and living expense
- Participation in the scientific activities of Quantum Universe and collaboration with its members

GOALS OF THE PROGRAMME

- Providing excellent research conditions for outstanding female researchers
- Attracting world leading researchers to Hamburg
- Providing role models for women in the physical sciences and encourage networking
- Starting new and intensifying existing collaborations

PREVIOUS SENIOR LAUREATES

2020

Prof. Dr. Belén Gavela
Universidad Autónoma
de Madrid

2021

Prof. Dr. Halina Abramowicz Tel
Aviv University

2022

Prof. Dr. Claudia de Rham
Imperial College London

PREVIOUS JUNIOR LAUREATES

2020

Dr. Kasia Rejzner
University of York

2021

Dr. Emanuela Dimastrogiovanni
University of Groningen

2022

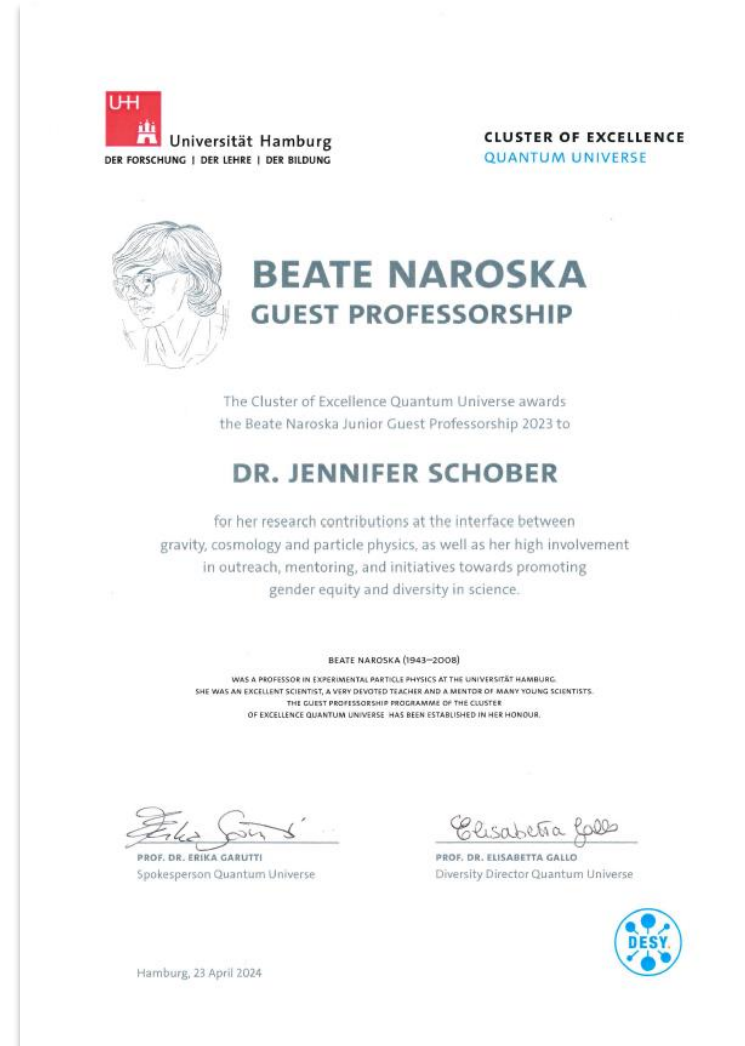

Dr. Gudrun Wanner
Leibniz University Hannover

2023 SELECTION

- Many excellent applications
- We thank the committee:

Elisabetta Gallo,
Oliver Gerberding,
Geraldine Servant,
Paul Wedrich,
Timo Weigand

2023 JUNIOR WINNER

2023 JUNIOR WINNER

Dr. Jennifer Schober

- 2014 PhD Universität Heidelberg
“On the role of the turbulent dynamo in the evolution of cosmic magnetic fields”
- 2015-2019 Postdoc fellowship in Stockholm and Lausanne
- since 2019 PI of the SNF PRIMA grant
“Magnetohydrodynamical dynamos: Astrophysical and cosmological applications and observational signatures”
- active supporter of mentoring program of the Swiss Physical Society and for the Girl's Day in Switzerland

2023 SENIOR WINNER

2023 SENIOR WINNER

Prof. Dr. Mariana Graña

- 2002: PhD UC Santa Barbara
- 2005-2015 CNRS Researcher, Saclay
- Since 2015: Research Director, Saclay
- Outstanding research in string theory, mathematics, particle physics and cosmology
 - ▶ ERC Starting Grant (2011)
 - ▶ ERC Consolidator Grant (2018)
 - ▶ 2021 Paul Langevin Prize
- Strongly involved in fostering diversity and gender equality in high energy physics
 - ▶ Co-Founder of Gender in High Energy Physics (GenHET)
 - ▶ Co-Founder of Mentoring Strings Program
